Lithopolis Winchester Road Detour Map

February 2013

Dear Neighbor,

Site preparation for the rehabilitation of the Lithopolis Winchester Road Bridge, spanning Little Walnut Creek, is now under way. Construction work will require the bridge to be closed to traffic in early June, following the end of the school year.

The project involves the reconstruction and repair of the bridge deck and superstructure.

The posted detour route for northbound motorists will follow Waterloo Road north to Hill Road, west to High Street, south to Columbus Street, and south to Lithopolis Winchester Road. Southbound traffic will follow the detour route in the opposite direction.

The Lithopolis Winchester Road and Winchester Road intersection, located just south of the bridge, will remain open except for approximately 30 days when the intersection is rebuilt. Access to the Old Town Tavern will be maintained using Winchester Road from the south.

The Franklin County Engineer's office will supervise the building of this \$1.7 million project by the Complete General Construction Company. Funding will be provided by the Federal Highway Administration and the Ohio Public Works Commission.

Thank you for your patience and understanding of our efforts to improve the Lithopolis Winchester Road Bridge. Please drive cautiously around our work site for everyone's safety.

For additional information, please call Greg Payne at (614) 525-6035 or visit our website at: www.franklincountyengineer.org

Sincerely,

Dean C. Ringle, P.E., P.S.
Franklin County Engineer
